**RE: Corrective Action Plan**  
Ravalli County Airport -Hamilton, Montana  
Facility # 99-95007, (formerly 41-03330), Release # 4414

Dear Mr. Clary:

Enclosed is a work plan and cost estimate for performing additional groundwater monitoring at the Ravalli County Airport facility in Hamilton, Montana as requested in a MDEQ letter dated January 2, 2007. The work will be completed to monitor dissolved petroleum hydrocarbons in groundwater at the site. The work described in this work plan includes:

- Conduct two (2) rounds of semi-annual groundwater monitoring for volatile petroleum hydrocarbons (VPH) and extractable petroleum hydrocarbons (EPH) at the site;
- Conduct a site survey on the monitoring wells and selected site features to a USGS vertical and horizontal datum;
- Collect SWLs from all site-related monitoring wells; and,
- Prepare one (1) groundwater monitoring report summarizing the results of both semi-annual monitoring events.

The work will be scheduled upon MDEQ-PRS & PFSS approval of this work plan. If you have any questions regarding this work plan, please feel free to call me at (406) 721-0354.

Sincerely,

Tyler Etzel  
Sr. Environmental Scientist
